Subject: What is the problem?

Why is the government even involved with this issue? Microsoft works as a company, bringing wealth and success to the nation and countless hundreds of thousands of people who rely on what MS produces.

To have the imperial federal government intrude on such matters defies logic. Microsoft produces wealth, whilst the imperial federal levithan consumes wealth.

Get out of this issue and, instead, promote Microsoft's well being. The federal government should stop consuming the nation's intellectual and financial resources.
